(54) PACKAGING MATERIAL FOR MICROWAVE HEATING, PACKAGE FOR MICROWAVE HEATING USING IT, AND FOOD FOR MICROWAVE HEATING

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a packaging material for microwave heating which does not cause harm to a human body by a change in quality, even when a packaging becomes a high temperature by heating the packaging containing a food with a microwave oven for heating or cooking the food, a packaging for microwave heating using the packaging material and the food for microwave heating packed in the packaging.

SOLUTION: The packaging material for microwave heating 1 is prepared by sticking a sheet 3, in which a change in quality such as melting or the like does not occur under a high temperature circumstance by heating with the microwave oven, on the surface of a heat resistant synthetic resin film 2 as a base material by the use of a food adhesive 4. The packaging for microwave heating is prepared by forming the packaging material for microwave heating 1 to a bag. The food for microwave heating is prepared by packing it in the packaging.
